

Paula's Plants and Flowers

Paula's Plants and Flowers sells both taxable and non-taxable items. They use the z-tape from their register (which details the day's sales and payment totals) to enter receipts using a sales receipt in QuickBooks Online. They hold their cash and checks together to make a deposit once a week.

Their MasterCard and Visa payments are reported together on the z-tape, but activity needs to be grouped together into one deposit in QuickBooks.

Amex payments that are deposited to their bank each day are not grouped with other day's payments.

Using the information from the z-tape and the above information. Determine the correct "product/service" setup required to correctly record this workflow for each item listed below:

Sales	Amount
Retail Sales – Taxable	1256.04
Retail Sales – Non-Taxable	231.06
Sales Tax	103.62
Total Sales	1590.72
Cash	215.84
Check	108.25
MC/Visa	1128.35
Amex	138.28
